Professor of Medicine, Allergy & Infectious Diseases,  
Harborview Medical Center  
University of Washington,  
Seattle, Washington

Jeffrey Wallace, MD, MPH  
Professor of Medicine  
Clinical Director of Geriatric Medicine  
University of Colorado Health Sciences Center in Denver

Lorena Alarcon-Casas Wright, MD  
Clinical Assistant Professor  
Metabolism, Endocrinology and Nutrition  
University of Washington Medical Center
1. Antibiotics use and misuse
   a. Identify the common antibiotic classes and appropriate uses in community acquired infections and MDRO.
   b. Recognize the importance of antibiotic stewardship.
2. Tuberculosis
   a. Identify the diagnosis, treatment and prevention in pulmonary TB and MDR TB.
3. What’s New in Infection Control
   a. Discuss the importance of hand hygiene and its impact.
   b. Identify different types of isolations/precaution, indications and recognize the pitfalls of infection control program.
4. What’s New in Meningitis
   a. Identify the common pathogens associated with bacterial, viral and fungal meningitis.
   b. Apply current treatment and prevention strategies.
5. Food Borne gastroenteritis and C diff
   a. Identify what is new in food borne gastroenteritis.
   b. Identify what is new in the diagnosis and treatment of C diff.
   c. Identify what is new in fecal transplantation.
6. Skin and Soft Tissue Infections/Wound Care
   a. Identify the common pathogens associated with skin and soft tissue infections, bone and deep infections and implantable device infections and treatment.
   b. Discuss the basic principles of wound care.
7. Dental Infections
   a. Describe how the inflammatory process of poor oral health affects the cardiac, immune, and endocrine systems.
   b. Describe how poor oral health is an added risk factor for diabetes and cardiac management.
   c. Describe the physician’s role in assessing and intervening in the oral health of their adult patients to improve patient outcomes.
8. Workshop on the New and Emerging Diseases
   a. Identify new and emerging diseases.
9. Vaccines
   a. Identify the new vaccines indicated for the adult and elderly, children and travelers
10. HIV, Hepatitis B and Hepatitis C
    a. Apply new treatment and prevention of HIV, Hepatitis B and Hepatitis C.
11. Pneumonia
    a. Apply new diagnosis, treatment and prevention strategies for bacterial and viral pneumonia, including influenza.
12. Workshop on Endocarditis

Meet The Experts Workshop Discussion Groups require pre-registration and an additional fee. Space is limited and will be filled on a first come first serve basis.
1. Cardiology – CHF/ New Technology
   a. Discuss the differential diagnostics of congestive heart failure and key historical, exam and diagnostic tests that support CHF. Recognize subtypes of heart failure and the implications for evaluation and treatment.
   b. Discuss evaluation of patients with congestive heart failure including the appropriate labs, imaging and tests for risk stratification to employ. Identify the predictors of outcomes that a provider should know.
   c. Identify how to choose among therapies that can improve cardiac function; ace inhibitors/angiotensin receptor blockers; vasodilators/nitrates; diuretics; isotopes. Highlight lifestyle changes and key points of patient education in treating heart failure patients.
   d. Discuss how to choose among therapies that can improve cardiac function; ace inhibitors/angiotensin receptor blockers; vasodilators/nitrates; diuretics; isotopes. Highlight lifestyle changes and key points of patient education in treating heart failure patients.

2. Hypertension
   a. Recognize appropriate initial evaluation testing of the patient presenting with hypertension; which patients need additional testing or early pharmacologic therapy.

3. Diabetes
   a. Identify what is new in glycemic goals for patients and how to reach them.
   b. Identify recent developments in therapies for Type 2 diabetes.
   c. Recognize in the epidemic of Type 2 diabetes, how should the less common Type 1 adult be detected.
   d. Discuss measures that can help prevent progression to type 2 diabetes in patients at risk.

4. Nephrology
   a. Identify new diagnosis and treatment of proteinuria and hematuria, renal stones and acute renal failure.
   b. Discuss recent decisions about when to start renal replacement therapies and how to have the best outcomes from dialysis.

5. Workshop: Risks and Care of Venous Access Devices, Ostomy Sites (Nursing Focus)
   a. Discuss short term and long term risks, appropriate issues for patient education and appropriate methods and supplies for caring for the following: indwelling venous catheters, peripheral lines, PICC lines, dialysis and other tunneled catheters and ports, chest tubes, ostomy sites, peritoneal dialysis hardware, urinary catheters.

6. Geriatrics
   a. Discuss important principles of health maintenance and disease prevention for geriatric patients. How should this impact the Patient Centered Health Home.
   b. Discuss current treatments and important considerations for helping patients with Parkinsonism.

7. Parkinsonism
   a. Identify what is new in prevention and detection of Parkinsonism.
   b. Discuss current treatments and important considerations for helping patients with Parkinsonism.

8. Dementia
   a. Identify what is new in the prevention and early detection of Alzheimer’s Dementia.
   b. Discuss current treatments and important considerations for helping patients with Dementia.

9. Preventive Screening
   a. Discuss the most cost effective disease prevention/screening interventions we should be practicing.
   b. Analyze the current recommendations for screening of cervical, colon, breast and prostate cancer.
   c. Determine a rational approach for deciding when to stop the screening tests.

10. Mental Illness
    a. Apply new diagnosis and treatment strategies for depression, schizophrenia and obsessive compulsive disorder.

11. Workshop: Anticoagulation
    a. Identify the various indications specific to currently available intravenous and oral anticoagulants.
    b. Describe the important facts a prescriber should know about the newest oral anticoagulants: dabigatran, rivaroxaban, apixaban, and are there new drugs on the horizon.

12. Affordable Care Act / Patient Centered Medical Home.
    a. Identify the current status of the ACA and implications for the practice of medicine and discuss and highlight the requirements.
